

SP-75

REMOTE PULPER

The **Somat SP-75 Pulper** is one part of a Remote Pulping System, pictured as a Hi-Tank pulper with optional water flushed tray. Below the tray feed is the slurry pump. The main benefits of a Somat Remote Pulping System are **Reduction** and **Transportation**. A remote system connects food prep and scrapping areas together through a series of piping and transports food service waste to a remote extractor. The extractor removes the solids (pulp) and recirculates the water back to the grinding tanks. The pulping process provides an 8 to 1 volume reduction (up to 85%.) The pulp is fed into a Somat Dehydrator for additional reduction or directly into a dumpster. A remote pulping system eliminates the need for trash cans, liners and laborers to “take out the trash”.

CAPACITY

1250 pounds per hour of foodservice waste mix, consisting of food scraps, plastics, milk cartons, paper, aluminum foil and cardboard.

TECHNICAL SPECIFICATIONS

Pulper:

- 30" diameter, 39.5" high polished stainless steel tank with water flushed feed tray
- Hinged lid with limit switch
- 3/8" thick stainless steel slurry chamber
- 7½ HP TEFC direct drive motor
- internal junk box and cutting mechanism
- HyPoint cutting mechanism, stainless steel, consists of 1 piece security ring with 4 stationary, replaceable top cutters and impeller with 2 replaceable rotating cutters.

Valve Package:

- All valves required for proper operation (fresh water, tray flush and drain lines).

Som-A-Trol Electrical Control Panel:

- UL approved stainless steel NEMA 4 panel with all components pre-wired to internal terminal strip. Push Button control station on panel door (remote control station optional). Panel to be wall mounted with field connection to pulper mounted junction box.

OPTIONS

- Feed trough connection
- Feed tray cover
- Prison package
- Under dish table unit

Special Requirements:

- Dual water level control and motor operated valve with controls. Required if more than one pulper operating with a single Hydra-Extractor.
- Stainless Steel Dam. Required when pulper is located higher (one level minimum) than the Hydra-Extractor.

Electrical Characteristics:

208/230/460 volt, 3 phase, 60 Hz.

FINISH

All exterior surfaces are polished stainless steel.
