DESCRIPTION:

Standard SOMAT® Model HE-6S-3 Hydra-Extractor® with 3 HP drive motor, 3 HP or 5 HP return pump, chemical additive pump, automatic rinse system, valve package, Som-A-Trol® control panel and discharge chute with limit switch.

Benefits
- As much as 8 to 1 (87.5%) volume reduction
- Reduced labor cost
- Better sanitation
- Water conservation
- Improved operator morale
- Reduced silverware loss

Processes a wide variety of waste

Operation: Slurry, consisting of 5% solids and 95% water, is automatically transported through a pipeline after being processed in the pulper(s) to the Hydra-Extractor, where water is removed and the resultant semi-dry pulp is discharged into a haul-away container. The extracted water is recovered and returned to the pulper(s) for reuse. The capacity of the Hydra-Extractor determines how many pulpers can be designed to operate with it concurrently.

Somat equipment provides an economic and efficient answer to cutting the high and ever increasing costs associated with waste handling. Manufactured by Somat Company of Lancaster, Pennsylvania, originators of waste pulping systems and specialists in waste reduction technology.

Item No: ____________________

Somat Model : HE-6S-3

Technical Specs:

Hydra-Extractor: Rigid stainless steel weldment with aluminum stand, head assembly with 3 HP TEFC drive motor mounted to a 20:1 gear reducer, 17” long stainless steel discharge chute with limit switch, chemical additive pump, automatic rinse system. Water extractor mechanism consists of 6” diameter stainless steel screw with nylon brush edge, stainless steel plug cutter and matching 6” diameter reinforced stainless steel screen.

Valve Package: All valves required for proper operation (automatic rinse system).

Som-A-Trol® (Electrical Control Panel): UL approved. Includes all necessary electrical components prewired to a terminal strip in a NEMA 4 stainless steel enclosure.

Options Available:
- Extended discharge chute
- Hinged Chute
- Extended stand
- Special electrical characteristics
- Pulp level detector

Special Requirements:
- 7-1/2 HP, 10 HP or larger return pump. Determined by piping conditions.
- Water economizing tank. Required when 7-1/2 HP or larger return pump is used.
- Pulp Screw Conveyor and controls. Required to convey pulp from discharge chute to haul-away container when location of container does not permit gravity discharge.

Electrical Characteristics: 208/230/460 volt, 3 Phase, 60 Hertz

Capacity: 1600 pounds per hour of food-service waste mix, consisting of food scraps, plastics, milk cartons, paper, aluminum foil and cardboard.

Finish: All exterior surfaces are stainless steel.

Equipment only is supplied by Somat Company; installation, piping and wiring not included.

Other Utility Requirements

**Fresh water:** 4 gpm @ 45 psig, 1/2” NPT (approximate usage 40 gallons/cycle).

**Drain:** 4” minimum floor sink, with stainless steel removable basket recommended.
